Statement by Lora Pellegrini, President and CEO of the Massachusetts Association of Health Plans, on the 2024 Presidential Election Results

The Massachusetts Association of Health Plans and our member plans will be closely watching the impact of the 2024 presidential election on the Commonwealth's health care financing and delivery system. Massachusetts' health care reform laws laid the framework for the Affordable Care Act and provide for strong consumer protections, robust coverage of preventive services, and care for our state's most vulnerable populations, including those receiving coverage through MassHealth and the Connector. Should the Affordable Act or other federal health reforms be eroded under the incoming Trump Administration, MAHP and our member plans stand ready to work closely with policymakers to ensure our existing statutory safeguards continue to ensure access for all Massachusetts residents to high quality, affordable, and equitable health care.
